What His Own Newspaper Said in 1893. If True Then, Why Not True Now?

Omaha World-Herald, August 3d, 1893.

The silver agitators who insist on free coinage upon The Dishonest Ratio of 1 to 16 and refuse to accept it upon the honest ratio of 1 to 25 are very anxious to delude the public into the belief that the demand for more currency and the demand for coinage upon the ratio of 1 to 16 are identical.

They brand as goldbugs all who decline to advocate 54-cent silver dol-

In truth, however, the only honest bimetallist is he who believes in the free coinage of gold and silver, each taken at its market value and so coined that 100 cents worth of gold shall be in the gold dollar and 100 Cents Worth of Silver Shall be in the Silver Dollar.

The bimetallist who advocates free coinage of gold and silver on a ratio of 1 to 25 is as much a believer in an increase in the circulation medium as the man who demands coinage on the ratio of 16 to 1.

The silverites in Chicago need not arrogate to themselves the championship of an increased currency. That is not their real purpose, nor is it the real effect of their agitation. They are only the champions of silver.

On a silver basis it either would cost him just double or it would go abroad. This alone, would take \$70 yearly out of each family's present earn-ings—the average increased cost for bread and meat. Whether the corn was used in johnny-cake or fed to the hogs the increased cost would have to be paid.

If the increased price of the hogs was not paid they would be salted, exported and sold at a gold price covering in-

SOME SILVER WS.

Here's a question we would like to have some good free silver man answer. Don't all speak at once now, but the same one answer it:

"If the mine stamp on a piece of sandard silver weighing 11½ grains makes it a dollar, really and truly, as do no in the country will buy only 50 cents worth of goods at home?

If the coinage is such a howling.

If free coinage is such a howling success, why do not the silver mine owners take their bullion to those free coinage countries, have it coined into aliver dollars, exchange them for gold dollars and come back to this country with a bull gold dollar for their 50 cents worth in other countries? What is the use of varning this country into a silver mill?

use of terming was mill?

If the dollars will not be cheaper, then the free silver advocates do not want them. If they will be cheaper, what laboring man or salaried employe wants them?

No one denies that the gold dollar should contain a dollar's worth of gold; then why shouldn't the silver dollar contain a dollar's worth of silver?

contain a dollar's worth of silver?
